Roan Arendtsz

921 Arlington Rd • Redwood City, CA 94062 • arendtszr@carleton.edu • https://roan-arendtsz.github.io/ • 650-759-3689

Education

CARLETON COLLEGE Northfield, MN
B.A. Physics & Astronomy
2023-2027
GPA: 3.92 overall, 3.96 in Math & Physics
Relevant Coursework: Atomic and Nuclear Physics, Classical Mechanics, Advanced Electricity & Magnetism, Quantum Mechanics, Open Quantum Systems, General Relativity, Linear Algebra, Ordinary Differential Equations, Real Analysis, Abstract Algebra, Algebraic Geometry, Differential Geometry
Expected Additional Coursework: Topology, Functional Analysis, Ergodic Analysis, Partial Differential Equations
Self studied: Complex Analysis (in progress), Advanced Classical Mechanics (in progress), Lie Groups (in progress) – available at https://roan-arendtsz.github.io/

UNIVERSIDAD COMPLUTENSE DE MADRID Madrid, Spain
Study abroad coursework in Madrid. September 2024 – November 2024

Research Experience

CARLETON COLLEGE Northfield, MN
Lorentz Invariance Student Research Partner September 2026 – Present

- Extended previously established method for constraining Lorentz violation into the neutrino sector
- Conducted independent literature review of Lorentz violation for neutrinos

Stellar Spectroscopy Student Research Partner March 2024 – Present

- Conducted 1000+ hours of self-driven research with Professor Ryan C. Terrien over two summers and six academic terms
- Improved precision of stellar spectroscopy measurements up to 3.2x by modeling and implementing a method in data-reduction pipeline for removing instrumental effects
- Led 28 page scientific paper with 11 collaborators submitted for publication in *The Astronomical Journal*
- Method adapted by several collaborators and integrated into published academic papers
- Communicated results to non-technical and expert audiences through poster session and teleconference presentations

UC IRVINE Irvine, CA
Student Researcher June 2026 – July 2026

- Demonstrated that a signal observed in spectroscopic data could not be explained by magnetic activity, helping to verify existence of several planets
- Identified systematic trend in spectroscopic data relevant to future detector upgrades
- Used Gaussian Process statistical framework to demonstrate improvement in detecting stellar rotation periods using data-reduction pipeline method
- Detected period of abnormal stellar activity relevant to stellar atmospheric studies
- Presented findings in non-technical poster session and teleconference presentation

MARATHON FUSION San Francisco, CA
Scientific and Engineering Physics Extern December 2025

- Conducted independent plasma physics literature review
- Synthesized variety of sources into streamlined presentation for executive team used for future projects

Steffanson, "Exploring the precision limits of activity tracer measurements in spectra from the Habitable Zone Planet Finder," revised manuscript submitted to The Astronomical Journal.

Manuscripts in Prep

[4] C.J. Rogers, P. Robertson, **R. Arendtsz**, C.H. Blake, W.D. Cochran, M. Endl, E.B. Ford, A. Gupta, S. Halverson, S. Kanodia, D.M. Krolikowski, S.E. Logsdon, S. Mahadevan, J.P. Ninan, A. Roy, C. Schwab, G. Steffanson, R.C. Terrien, and J.T. Wright, "No One Home: Additional RVs of Barnard's Star Validate Known but Preclude Habitable Planets"

Fellowships

Kolenkow-Reitz Fellowship June 2026 – July 2026
Role: Student Research Assistant
$4460

Professional Memberships

Sigma Xi , The Scientific Research Honor Society — Member
August 2026 – Present

Teaching Experience

Problem Solving Facilitator January 2026 – Present
- Independently helped students work through homework assignments

Lab Assistant September 2025 – Present
- Aided instructors in conducting laboratory activities
- Assisted variety of courses including Mechanics, Electricity & Magnetism, and Observational Astronomy

Grader September 2025 – Present
- Provided prompt and thorough grading and feedback to students

Service

Society of Physics Students Secretary September 2026 – Present
- Ran and elected as secretary of local chapter
- Increased APS membership within physics department

Astronomy Club Captain September 2024 – Present
- Conducted tours of observatory to general public
- Aligned and set up telescopes for observation nights

Skills

Technical: Python, Mathematica
Language: Spanish (Fluent)
Laboratory: Oscilloscope, Breadboard, Circuitry, Geiger tube & counter
